Redesigning and Rethinking the Future

Hosted by

Founded in 2013, the Stanford Women and Sex Differences in Medicine (WSDM) Center focuses the spectrum of biological (and sociocultural) differences (and similarities) that may affect female, male and LGBTQI health outcomes over the life course. Our initiatives include research, education, clinical interface and campus + community engagement.

The mission of the Stanford Center on Longevity is to redesign long life. The Center studies the nature and development of the human life span, looking for innovative ways to use science and technology to solve the problems of people over 50 by improving the well being of people of all ages.

Philip A. Pizzo, MD
David and Susan Heckerman Professor of Pediatrics and of Microbiology and Immunology
Founding Director, Stanford Distinguished Careers Institute
Former Dean, Stanford School of Medicine

Thursday, September 18, 2014
Gunn Building (SIEPR)- Koret Taube Room
Speakers

Marcia Stefanick, PhD
Co-Director & Co-Founder, Stanford Women & Sex Differences in Medicine (WSDM) Center. Professor of Medicine at the Stanford Prevention Research Center (SPRC) and Professor of Obstetrics and Gynecology, Stanford University School of Medicine.

Lynn Westphal, MD
Co-Director & Co-Founder, Stanford Women & Sex Differences in Medicine (WSDM) Center. Associate Professor of Obstetrics and Gynecology (Reproductive Endocrinology) at Stanford University Medical Center.

George D. Smith Professor in Translational Medicine, Professor, Chemical and Systems Biology

Laura Carstensen, PhD
Fairleigh S. Dickinson Jr. Professor in Public Policy, Professor of Psychology, Director, Stanford Center on Longevity

Agenda

Welcome - 4:15pm
Marcia Stefanick & Lynn Westphal

Reflections - 4:30pm
Daria Mochly-Rosen

Rethinking - 4:40pm
Philip Pizzo

Redesigning - 5:00 pm
Laura Carstensen

Reception – 5:15 – 7:00 p.m.

Philip A. Pizzo, MD

Philip Pizzo, MD, is the David and Susan Heckerman Professor and Founding Director of the Stanford Distinguished Careers Institute. Dr. Pizzo served as Dean of the Stanford School of Medicine from April 2001 to December 1, 2012, where he was also the Carl and Elizabeth Naumann Professor of Pediatrics and of Microbiology and Immunology. Dr. Pizzo has devoted much of his distinguished medical career to the diagnosis, management, prevention and treatment of childhood cancers and the infectious complications that occur in children whose immune systems are compromised by cancer and AIDS. He has also been a leader in academic medicine, championing programs and policies to improve the future of science, education and healthcare in the US and beyond.
